

Consumer Pyramid Registration/Access Process

Learning Centre
Indian Institute of Management Indore

About Resource

The Consumer Pyramid Survey is the largest survey of households in India. This is done during three rounds in a year, four months or on waves throughout the year. The sample size of survey is around 170,000 households, and the sample is maintained as a panel surveyed over multiple Waves. This collection contains the following 4 databases:

People of India dx: It includes 71 variables covering Identity (gender, age, marital status, education, state of origin, religion, caste, and migration), Employment (labor status, type of worker, occupation, and industry), Health (health status, medication and hospitalization), Financial inclusion (access to bank accounts, credit cards, health insurance, and mobile phones), and time use for work and leisure.
